

ECOTROC® AT-HP | KSI ECOCLEAN® HP

High-pressure Adsorption Dryer, Activated Carbon Adsorber and Filter

For economical processing through high-pressure compressed air applications

up to
500
bar

Mechanical engineering competence „Made in Germany“

Maximum mechanical engineering competence and production „Made in Germany“ guarantee a safe and reliable preparation of compressed air in the standard range from 50 bar to 450 bar (on request up to 500 bar).

The ECOTROC® ATKN-HP series continues the globally successful ECOTROC® ATK adsorption dryer series. The design and the process engineering of the ATK-HP series are thus proven.

In addition to adsorption dryers, compressed air filters are also among the most important components in the high-pressure range, both for the simplest and the most complex installations. With housings made of aluminium and stainless steel as well as filters and filter elements for pressure stages up to 450 bar (up to 500 bar on request), the KSI also sets standards with the KSI ECOCLEAN® series.

The high-pressure components in industrial supplier quality provide a safe and compact system solution with the KSI-typical, excellent price/performance ratio.

The ECOTROC®ATKN-HP Plus-Effects +++

- + the new benchmark in the cost-benefit ratio
- + compact design
- + premium high-pressure fittings
- + weld seam-free stainless steel containers
- + internal self-cleaning dust filter
- + stainless steel towers with 3-bed filling
- + preloaded desiccant bed
- + low-maintenance fittings
- + maximum service life and service life
- + robust, torsion-resistant construction and design
- + high-quality components => long service life
- + intelligent control => comfortable operability & operation
- + high service and maintenance friendliness => minimized service costs
- + with compressor synchronisation control as standard
- + upper valve unit incl. variable purge air nozzle

ECOTROC® AT-HP

High-pressure Adsorption Dryer and Activated Carbon Adsorber

Scope of supply AT-HP

**ATKN-HP (heatless regenerated) and
ATON-HP (heatless regenerated, oilfree):**

including:

- prefilter **KSI EOCLEAN® HP-SMA**
- afterfilter **KSI EOCLEAN® HP-DMF**
- electrical control **EOMATIC**
 - including compressor synchronizing circuit
- **ATON-HP:** residual oil content up to < 0,003 mg/m³ at 20°C

capacity dew point: -20°C up to -70°C
(-40°C standard)

ATCN-HP activated carbon adsorber:

including:

- afterfilter **KSI EOCLEAN® HP-DMF**
- residual oil content up to < 0,003 mg/m³ at 20°C

Delivery options*

- **ATKN-HP** heatless regenerated high-pressure adsorption dryer
- **ATCN-HP** high-pressure activated carbon adsorber
- **ATON-HP** heatless high-pressure adsorption dryer with activated carbon adsorber

*higher capacities and temperatures on request.

ATKN-HP 450

- + weld seam-free stainless steel vessels for working pressure stages up to PN450
- + vessel closure with double O-ring
- + preloaded and fixed desiccant bed
- + internal, self-cleaning dust filter
- + stainless steel vessels with 3-bed filling
- + dew point sensor for pressure dew point measurement PN450
- + start-up device PN450
- + high performance silencer
- + check valve unit with adjustable nozzle FHP60 B450
- + pre- and afterfilter made of stainless steel (1.4401)
- + automatic condensate drain up to 500bar
- + detachable lifting lugs
- + standard frame also available in shock-resistant design up to 15g
- + frame with powder coating also available with seawater resistant design
- + vibration damping machine feet

Upper valve unit with adjustable purge air nozzle
